*"We aren't about to shift to flying saucers just yet"*

*Cartoon supplied by Graham McCulloch*

***Are you still wondering what you want to do with the rest of your life? Now this sounds like the start of a deep and meaningful conversation and maybe it is the start of one for some of us but read on and discover a land of opportunity here on your doorstep.***

The automotive industry including car dealerships, tyre retailers, auto electrical companies, panel beaters are all in a very busy growth phase at the moment. There are opportunities for rewarding employment in all of these industries here in Dalby.

Your first thought may be that you don't want to end up covered in grease all day every day and I agree with you. You should take the time to visit any of the modern workshops in any of the above types of businesses locally and you will see that they are now clean well equipped places with highly trained technicians employed there. Now if you are not inclined to want to fix things, why not consider a parts, sales or administration traineeship.

The facts are that the new car market has

been breaking records for the last few years and is predicted to stay on the same trend for the rest of this decade. Also, don't forget the added activity that is currently happening right here in our town. I heard the other day that the Dalby Town Council is predicting the population of Dalby to grow by 3,000 in the next few years.

All these things are making the automotive industry here in Dalby much busier and you guessed it, that creates employment opportunities. The savvy people will see all this happening and target the automotive industry for a career move.

We all drive cars and machinery and it's a fact of life that as we drive them they need to be serviced, repaired and rebuilt.

We aren't about to shift to flying saucers just yet!
